

Grow forward and maximize your crop's needs with CropSync.

Crops often don't have the micronutrients needed for optimal performance. CropSync™ Granular Micronutrients deliver essential micronutrients in one easy-to-apply package.

An all-in-one granule for broad use.

Formulated for use in broad acre and specialty crops, CropSync products are easy to use and easy to apply. In addition, CropSync products are designed to be blended with NPK granular fertilizer programs.

Take advantage of Nutripaction® and Verdesian polymer technology.

The propriety Nutripaction process in CropSync is used to combine finely divided raw materials into a clean, low dust homogeneous granule for ease of handling, blending and spreading. These combination micronutrient formulations also contain a unique combination of sulfates and sucates that are enhanced with Verdesian polymer technology. This unique combination delivers improved nutrient availability and performance, ensuring your crops have micronutrients and sulfur on-demand.

Multiple formulations for any need.

CropSync products are available in multiple formulations and customizable options to fit your crop's needs for zinc, sulfur, iron, boron, manganese, copper and humic acid.

Formulations:

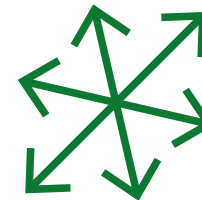

- CropSync Essential™
- CropSync Plus™
- CropSync Ultra™
- CropSync Complete™

CROPSYNC FORMULATIONS								
	S	Ca	Zn	B	Mn	Fe	Cu	HUMATE
ESSENTIAL @ 15 LBS PER ACRE	2.0		1.5			1.5		
PLUS @ 20 LBS PER ACRE	2.0	1.2	1.5	.25				
PRO @ 20 LBS PER ACRE	1.9	1.0	1.5	.25	1.0			
COMPLETE @ 20 LBS PER ACRE	1.9	1.0	1.0	.25	1.0	0.7	.25	

NOTE: Each formulation of CropSync features Verdesian polymer technology.

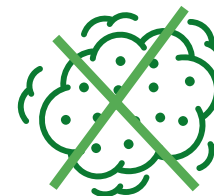

Soybeans treated with CropSync (left) show more nodule development compared to untreated.

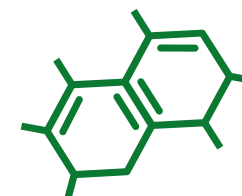

NUTRIPACTION TECHNOLOGY MEANS BETTER DISPERSION

SEASON-LONG MICRONUTRIENT AVAILABILITY

LOW DUST FOR HANDLING, BLENDING AND SPREADING

VERDESIAN POLYMER TECHNOLOGY

EASY APPLICATION

ENHANCES 4R NUTRIENT STEWARDSHIP

Verdesian Life Sciences makes farming more efficient, more sustainable, and more profitable. Verdesian Life Sciences develops nutrient use efficiency and management technologies to enhance crop uptake, reduce nutrient losses to the environment, and improve yields. As a 4R Nutrient Stewardship Partner, Verdesian is committed to researching and developing environmentally sustainable products.
