GENERAL INFORMATION

AVAIL® T5 LIQUID is designed to be mixed into liquid phosphate fertilizers (i.e., 10-34-0 and other liquid phosphate fertilizers) applied in low volumes (<15 GPA) as starter or pop-up fertilizers, to keep phosphate more available to the plant. AVAIL® T5 LIQUID increases phosphate availability through all stages of plant growth, including the early development period crucial for increasing yield potential. AVAIL® T5 LIQUID is water soluble, biodegradable, and nontoxic. When added to liquid phosphate fertilizers, AVAIL® T5 LIQUID inhibits phosphate fixation.

SOIL TYPES AND CROPS

AVAIL® T5 LIQUID is designed to reduce fixation of phosphate fertilizers in any soil type and to be used with any crop where phosphate fertilizer is deemed by best management practices to be useful for plant growth and development.

MIXING RATE OF AVAIL® T5 LIQUID

AVAIL® T5 LIQUID is recommended for use at a rate of 0.5% (0.5 gallons of AVAIL® T5 LIQUID with 99.5 gallons

of liquid tank mix). AVAIL® T5 LIQUID concentration needs to be 0.5% of total tank mix.

MIXING INSTRUCTIONS

To test compatibility of AVAIL® T5 LIQUID with pesticides, surfactants and other products, a proportional mixture of AVAIL® T5 LIQUID (Using Mixing Rates stated on the Label), liquid phosphorus fertilizer and the other products to be tested should be mixed in a jar or beaker, prior to adding AVAIL® T5 LIQUID or liquid phosphate fertilizer containing AVAIL® T5 LIQUID to an entire tank mix. AVAIL® T5 LIQUID should only be added to the liquid tank mix after the liquid phosphorus fertilizer has been added.

“316” stainless steel pumps and attachments are recommended. When seals are used, seals made of “Gore-tek”, “Teflon” or “Viton” are required.

APPLICATION RATES

AVAIL® T5 LIQUID treated phosphate fertilizer should be applied to the soil in the same manner as phosphate fertilizers without AVAIL® T5 LIQUID.

NOTE: When using AVAIL® T5 LIQUID, if different farming methods from those normally used are tried, test strips are recommended until such new methods have been proven to be effective.
