

PRIMO POWER CL

A VERDESIAN NUE SOLUTION™

MAXIMIZES PEANUT GROWTH

Primo Power CL liquid inoculant generates a healthier peanut plant right from the start, providing the potential for more nodules and thus more nitrogen, resulting in better yield potential.

NITROGEN FUELS YIELD IN PEANUTS

Primo Power CL aids in boosting yields by helping peanut plants reach more of their full potential. More nodules mean more nitrogen to the plant, resulting in better yield potential.

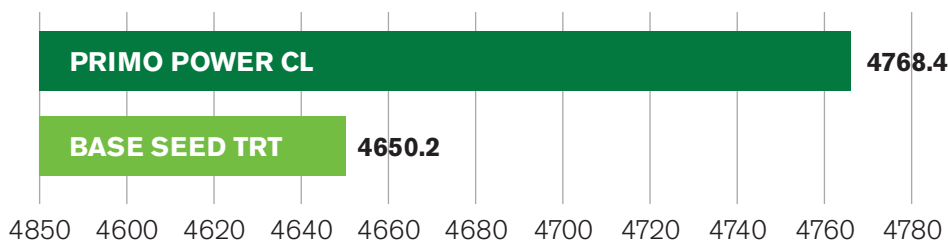

PERFORM WELL - NO MATTER THE ENVIRONMENT

Primo Power CL contains multiple strains of rhizobia that have been selected and produced to perform well under stress to ensure optimum performance in all conditions.

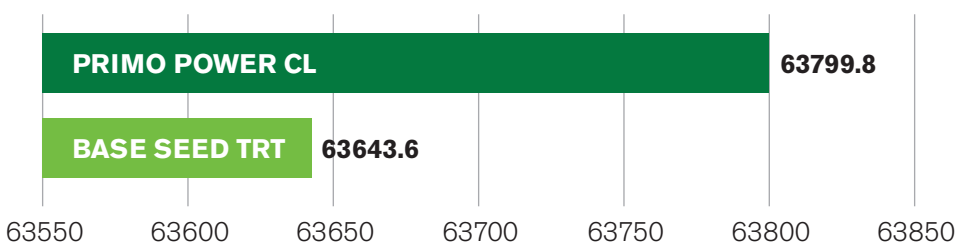

A SUPERIOR FORMULATION FOR A SUPERIOR INOCULANT

With one of the highest rhizobia concentrations in the industry, Primo Power CL delivers 4.5 billion (4.5×10^9) colony-forming units (CFUs) of rhizobia per gram to the plant. This high concentration ensures the highest level of aggressive rhizobia to produce larger amounts of peanut-producing nitrogen.

2017-2019 PRIMO POWER CL YIELD - 12 SITES

2017-2019 PRIMO POWER CL STAND 21 DAP - 7 SITES

REGION

Southeast, Mid South, Southwest
