

SEED+GRAPHITE®

The Seed Lubricant that delivers ROI.

SEED+ PERFORMANCE IN CORN

187 bu/A

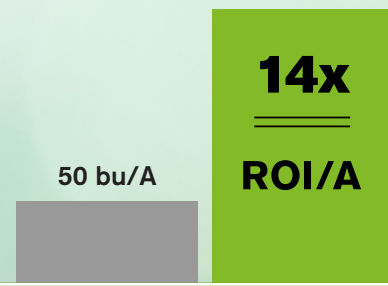

CONTROL

SEED+GRAPHITE

n=20, 80 replications, trials located in IA, IL, KS, MN, NE, OH, SD, TN, WI, MD. Data on file.

SEED+ PERFORMANCE IN SOYBEAN

53 bu/A

CONTROL

SEED+GRAPHITE

n=20, 80 replications, trials located in IA, IL, KS, MN, NE, OH, SD, TN, WI, MD. Data on file.

- **Biostimulants** to help crops better tolerate abiotic stress
- **Nutrients** to help establish strong, even stands
- **Talc & graphite** for consistent and efficient planting

Aside from lubrication and drying seed, what has your seed lubricant done for you lately?

SEED+GRAPHITE delivers the benefits of talc & graphite for planting efficiency—but it's packed with biostimulants and nutrients to help seedlings get off to a strong start and better tolerate abiotic stresses like cold snaps and too much (or too little) moisture.

SEED+GRAPHITE delivers proven ROI and agronomics where traditional seed lubricants can't. Apply **SEED+GRAPHITE** just like you'd apply talc and graphite or any other seed lubricant and see the difference for yourself.
