crosync^m A VERDESIAN NUE™ SOLUTION **Micronutrition On-Demand VERDESIAN** THE NUTRIENT USE EFFICIENCY PEOPLE™

POWERFUL MICRONUTRITION

Row and specialty crops often don't get the sulfur, zinc, manganese or boron they need for optimal performance. MicroSync™ Granular Micronutrients are formulated with Verdesian Polymer Technology to help synergize and increase the availability of both secondary and micronutrients for plant uptake in broad acre and specialty crops.

MicroSync's proprietary combination of Verdesian Polymer Technology and the Nutripaction® process creates a unique combination of micronutrition that offers improved nutrient availability and performance, ensuring your crops have micronutrients and sulfur on-demand.

Additionally, these low-dust, free-flowing, all-in-one granules are designed to be blended with NPK granular fertilizer programs, making them easy to use and apply.

A VERDESIAN NUE™ SOLUTION

One easy-to-apply package

HOW IT WORKS

MicroSync Granular Micronutrients provide optimal dispersion through our proprietary Nutripaction technology.

- They begin as a blend of fine, powdered raw materials.
- They are then combined into a homogenized compound granule.
- Once the MicroSync granules are exposed to moisture in the soil, they begin to break back down into finely divided particles for maximum soil contact and optimal root zone interception.

As part of our Nutrient Use Efficiency platform, our Verdesian polymer technology delivers a more efficacious and economical granule by:

- Lowering the pH in the microenvironment around the granule, increasing availability.
- Protecting provided micro and secondary nutrients for seasonlong availability.

Formulated using multiple sources, MicroSync provides both immediate and prolonged availability of micronutrients.

- Uses several unique modes of action for the release and availability of desired nutrients.
- Formulated with micronutrients for short, intermediate and long-term release characteristics.

OUR FORMULATIONS TAILORED TO YOUR CROPS' NUTRIENT NEEDS

POLYMER TECHNOLOGY IS IN ALL FORMULATIONS

MicroSync Basic[™] and MicroSync Plus[™] are both intended to be mixed or blended with other fertilizer materials. The products are recommended for the correction of multiple deficiencies on any agricultural or horticultural crop where a nutrient deficiency may exist (as determined by tissue analysis and soil testing).*

A VERDESIAN NUE™ SOLUTION

A VERDESIAN NUE™ SOLUTION

MicroSync Pro[™] and MicroSync Ultra[™] are both intended to be mixed or blended with other fertilizer materials. These products are recommended for the correction of multiple deficiencies on any agricultural or horticultural crop where a nutrient deficiency may exist (as determined by tissue analysis and soil testing).* MicroSync Ultra™ contains humic acids, which are important chelating agents, combining minerals into organic compounds that are more available to plants.

microSyncPRO™

A VERDESIAN NUE™ SOLUTION

microSyncULTRA[™]

A VERDESIAN NUE™ SOLUTION

MicroSync Complete™ is intended to be mixed or blended with other fertilizer materials. This product is recommended for correction of multiple deficiencies on any agricultural or horticultural crop where a nutrient deficiency may exist (as determined by tissue analysis and soil testing).*

microSyncCOMPLETE[™] A VERDESIAN NUE™ SOLUTION

^{*}Applies to all 5 products: To correct deficiencies, consult your local agricultural extension professional or professional consultant. This product is for soil application only.

GUARANTEED ANALYSIS

APPLICATION RATES lbs/ac.
