MicroSync® Zinc Granular Micronutrient Fertilizer is formulated for use in broad acre crops and designed to be blended with NPK granular fertilizer programs. This micronutrient formulation is a free flowing, low dust, and uniform granular fertilizer, which contains a unique combination of Sulfates and Sucrates for enhanced microbial activity and bioavailability. MicroSync Zinc boosts soil fertility programs by providing a superior balance of nutrients precisely formulated to prevent or correct Zinc deficiencies.

WHY MICROSINC ZINC?

- **Verdesian Exchange Resin Technology** and carboxylates synergize micronutrient and sulfur availability for plant uptake
- **Nutripaction® Technology** — Uniformly blended combinations of finely divided particles compacted together produces homogeneous granules consistent in particle size and analysis. In the soil, Nutripaction granules are activated by soil moisture creating millions of particles within the root zone for conversion and uptake
- **Balanced nutrient formulations** designed with your crop in mind, delivering critical micronutrients and sulfur
- **Ideal for blending** with NPK fertilizers with an ideal spread pattern at 5-20 lbs. per acre
- **Matches particle size and bulk density** of most dry fertilizers for a more uniform distribution of critical nutrients. The bulk density of MicroSync Zinc is 77 lbs. per cu ft.

DIRECTIONS FOR USE

MicroSync Zinc is recommended for correction of zinc deficiencies, as determined by tissue analysis and soil testing, on any agricultural or horticultural crop where a deficiency of Zinc may exist. When deficiencies exist, use the following table or consult your local agricultural extension professional or your local professional consultant. This product is for soil application only.

Amount of MicroSync Zinc per Acre Will Provide XX lbs of Nutrient per Acre				
	10 Lbs/Acre	20 Lbs/Acre	30 Lbs/Acre	40 Lbs/Acre
Sulfur	0.60	1.20	1.80	2.40
Zinc	0.50	1.00	1.50	2.00
