

REGION
All regions

CROP
Corn, cereals,
soybeans and cotton

TIMING
Pre-season, planting,
in-season

RATE
Liquid: 2 qt./100 Gal.
Granular: 2 Qt/Ton

PACKAGE
2.5 Gal.,
250 Gal. tote, bulk

AVAIL® T5 uses patented polymer technology to make applied Phosphorus (P) more available for plant uptake, speeding early growth, making crops healthier and boosting yields — while continuing to reduce the amount of P lost to the environment. The improved formulation also means better handling, storage, and ease-of-use.

IMPROVED PHOSPHORUS EFFICIENCY

- Increased Phosphorus uptake stimulates enhanced root development and biomass accumulation
- Better stress tolerance for early-season performance
- On average, 45% more P available depending on soil type and environmental conditions

POWERED BY EXCLUSIVE T5 (TETRA) POLYMER TECHNOLOGY

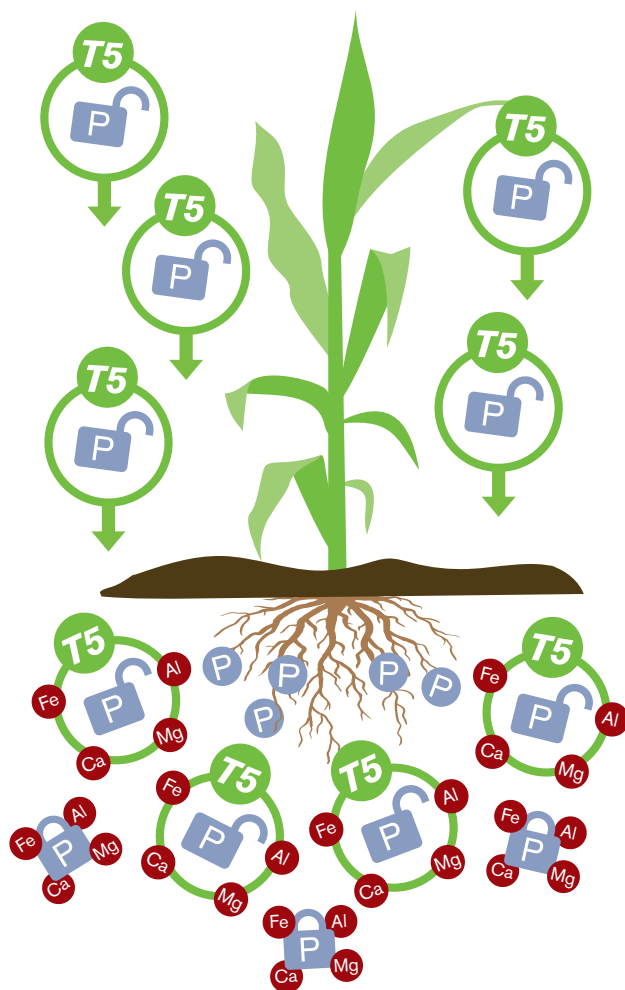

- Highly effective charge delivers more consistent results in varying conditions
- **AVAIL T5** patented exchange resin technology delivers a charge of -1800 meq/gram of CEC for maximum cation sequestration
- Enhanced 3D polymer structure with improved surface area to volume ratio

IMPROVED FORMULATION AND APPLICATION

- Improved efficacy across range of soil pH and more consistent across all soil types
- Better handling, storability, and ease-of-use
- Use to treat broadcast, banded, and in-furrow Phosphorus applications
- Available in both liquid and granular formulations

HOW AVAIL WORKS

- Phosphorus binds with cations naturally found in soil such as Ca, Fe, Mg, and Al
- The high negative charge of AVAIL attracts these cations, releasing and or preventing their hold on Phosphorus – making it more available for the crop and consistently supporting higher yields

USE SOIL TESTING FOR PRECISION PLACEMENT ON THE AVAIL ACRE

AVAIL^{T5}

Soil conditions vary geographically. Soil testing provides the needed information to find those acres where applied Phosphorus is most threatened and **AVAIL T5** performs best.

pH	SOIL TEST PHOSPHORUS RATING				
	VERY LOW	LOW	MED	HIGH	VERY HIGH
< 5.0	5	5	4	3	3
5.1-5.7	5	5	4	3	2
5.8-6.2	5	4	3	2	2
6.3-6.8	3	3	3	2	1
6.9-7.4	5	4	3	2	2
7.5-8.0	5	5	4	3	2
> 8.0	5	5	4	3	3

FULL RATE PHOSPHORUS	
AVAIL T5 ROI RATING	EXPECTED PROBABILITY OF POSITIVE ROI
5	> 95%
4	> 90%
3	> 80%
2	> 60%
1	> 40%

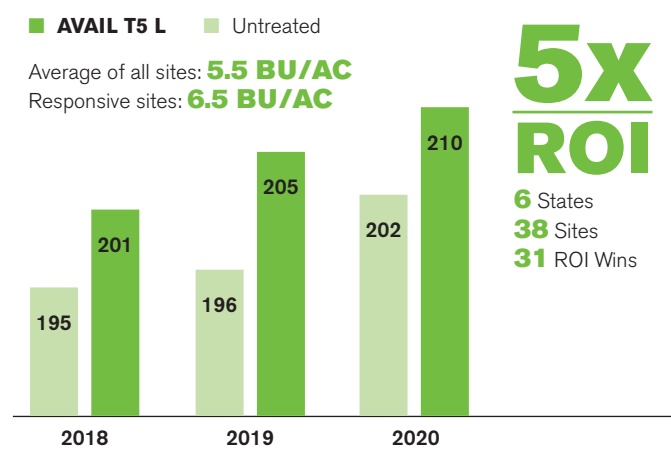

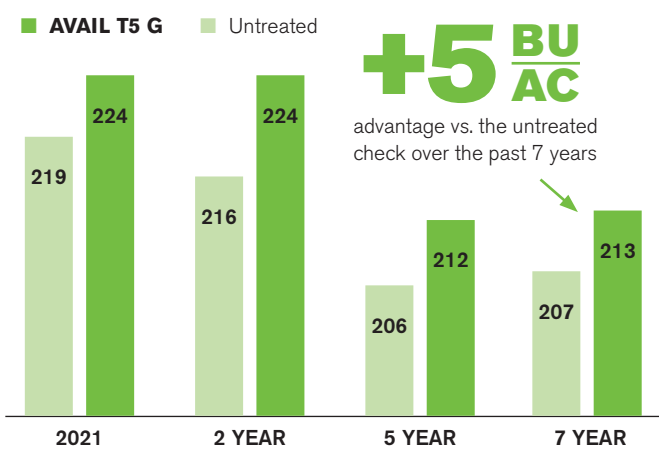

Based on soil test results, precision ag software can analyze AVAIL T5 performance field-by-field with a single click. Available for most commonly used software platforms. Ask your Verdesian Account Manager for more information.

AVAIL T5 PERFORMANCE DATA – A TRACK RECORD OF PROVEN PERFORMANCE

Corn 56 sites & 272 replications ranging over a multitude of soil types and growing conditions over the past 7 years.

Corn data represents a combination of small plot and field trials with 3 replications or more. States represented are IL, IA, KS, MD, MN, and NE.
