

RECOVERY FRUIT

0-0-24

according to recommendations based on plant tissue or soil analysis. For agricultural use only.

GUARANTEED ANALYSIS

Soluble Potash (K₂O)24%

Derived from Potassium Acetate.

WARNING

Harmful if swallowed. Causes skin irritation and serious eye irritation.

PRECAUTIONARY STATEMENTS

Wash face, hands and any exposed skin thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves/protective clothing/eye protection/face protection.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice/attention.

IF ON SKIN: Wash with plenty of water and soap. Take off contaminated clothing and wash before reuse. If skin irritation occurs: Get medical advice/attention.

IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell. Rinse mouth.

Dispose of contents/container to an approved waste disposal plant.

GENERAL INFORMATION

ReKovery Fruit is designed for foliar application on plants to prevent or correct nutrient deficiencies that may limit crop growth and yields. It is water soluble and nontoxic to plants when applied as directed. For best results, apply ReKovery Fruit

DIRECTIONS

Shake well before use. Keep from freezing. Dilute one part ReKovery Fruit with 20 or more parts water. Apply by a spray method and with an adequate amount of water that will provide complete coverage of the plants. Do not apply undiluted. ReKovery Fruit can be included in a regular spray program on crops. Consult with a Verdesian Life Sciences representative on compatibility with other spray materials. The rate of application will depend on the crop, stage of growth, and severity of deficiency. The maximum recommended rates are for mature, full-sized plants. Reduce the rates proportionately when spraying smaller plants.

RECOMMENDATIONS

Field Crops and Vegetables: Apply 2 quarts to 3 gallons per acre during periods of rapid growth or nutritional stress. The application may be repeated 2 or more times through the growing season.

Tree Crops/Hops: Make an application at a rate of 2 quarts to 3 gallons per acre at fruit development stage. The application may be repeated at 2 to 4 week intervals through the growing season. For sprinkler or drip irrigation apply at 2 quarts to 5 gallons per acre.

Grapes and Berries: Make an application of 1 to 3 quarts per acre after active growth begins. The application may be repeated at intervals of one week or more through the vegetative-growth period.

Ornamental Trees, Shrubs, and Flowering Plants: Dilute at a rate of 32 fluid ounces in 10 or more gallons of water and spray to complete coverage.
