

ACCOLADE®-L

FLEXCONNECT®

A Biological Growth Enhancement Liquid for All Crops

F002331

CONTAINS NON-PLANT FOOD INGREDIENT: SOIL AMENDING INGREDIENTS:

Azospirillum brasilense 1 x 10⁹ CFU/ml

This product does not meet the hazardous criteria set forth by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200).

KEEP OUT OF REACH OF CHILDREN

Read all label directions carefully before using this product. Use standard protective clothing and equipment including gloves, safety glasses and a NIOSH or MSHA approved nuisance dust mask during product handling and storage. See product SDS for additional health and safety information. This product contains live organisms that are sensitive to chemicals and harsh environmental conditions.

DIRECTIONS FOR APPLICATION

Avoid prolonged or repeated skin contact and inhalation. Verdesian recommends the use of a dust mask, safety glasses, and protective gloves when applying inoculants.

ON SEED

Shake well before opening package.

Apply ACCOLADE®-L at a rate of 2.5 fl. oz. per 50 lbs. of medium sized seed (e.g., cereal, pulse, or soy), or at a rate of 15 fl. oz. per 50 lbs. of small seed (e.g., canola, or flax) and immediately begin mixing.

Mix until seeds are thoroughly coated.

Allow seed to dry before handling.

Maximum product distribution on the seed will be achieved with a commercial applicator.

Plant as soon as possible or within 20 days, for untreated seed. If seed treatments, such as fungicides are used, the planting window will decrease. Consult an Verdesian representative for more information on inoculant fungicide compatibility.

CAUTION: Over application could cause bridging of the seed and seed flow problems in the planter.

IN FURROW

Shake well before opening package. Settling of bacteria is normal; shaking the product will achieve uniform distribution of the bacteria.

Preparation: Pour entire contents of ACCOLADE-L into a clean tank for a liquid in-furrow delivery system. Add cool, clean, non-chlorinated water to the appropriate level. Product will mix naturally; therefore agitation is not necessary for the product to remain in suspension. However, mild agitation can be beneficial.

Application: Do not mix more ACCOLADE-L than can be planted in one day. Do not allow the tank mix to exceed 90°F. Use one 350 fluid ounce bladder per 50 acres. Dilute ACCOLADE-L with as much water as possible (5-10 gallons per acre). Apply product directly into the seed trench. Do not band, knife, or apply ACCOLADE-L to the top of the soil. *Azospirillum brasilense* migrate slowly in the soil. It is important that the product is placed as close to the seed as possible. Plant into moist soil. In hot, dry soils irrigate ground as soon as possible starting with seed area that was planted first. Extended periods of hot, dry soils may have a detrimental effect on the viability of the *Azospirillum brasilense*.

ACCOLADE®-L can be used in conjunction with most seed treatments. Contact Verdesian for a complete list of compatible seed treatments.

STORAGE/DISPOSAL RECOMMENDATIONS

Store in a cool, dry place out of direct sunlight. Keep from freezing. Store between 40° and 77°F (4°C and 25°C). Open package only when ready for use. Use before expiration date. Do not allow product or packaging to become wet or exposed to high humidity. Do not store product in an area to be fumigated. Small amounts of product which cannot be used according to the label instruction may be disposed of in a landfill.

THIS PRODUCT CARRIES A ONE (1) SEASON SHELF LIFE.

Lot No.: XXXXXXX

Mfg Date: MM/DD/YYYY

Exp Date: MM/DD/YYYY

Net Contents: 2x2.75 gal (10.4 L) bladders

Net Wt.: 49.3 lb (22.2 kg)

Inv. ID: 1007636

Density: 8.51 lbs/gal (1.02 g/mL) Inoculant
