RATE

Per 100K gal manure:

HOG

Low rate: 2 gal
High rate: 4 gal

CATTLE

Low rate: 1.5 gal
High rate: 3 gal

PACKAGE

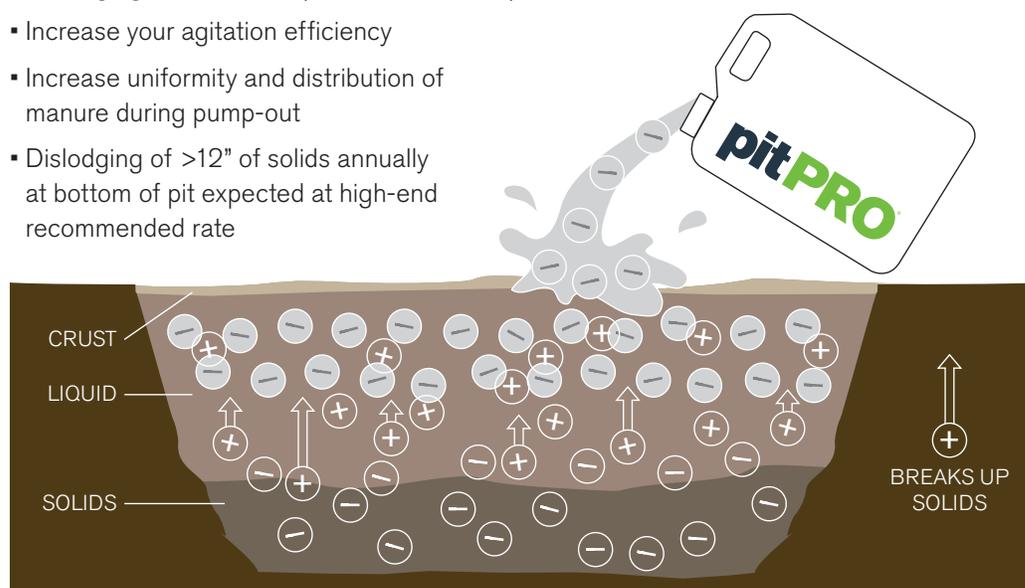

2.5 gal,
250 gal tote

Pit Pro® is for use in manure pits to increase pump-ability and reduce solids for a more uniform pump-out and distribution of your manure.

Pit Pro® works as an ultra-negative charged long-chained molecule. When Pit Pro enters the pit, it immediately starts drawing up the positively charged solid particles off the bottom of your pit, just like a magnet, dislodging solid buildup. The length and width of the molecules in Pit Pro allow it to stay in suspension, pulling molecules into suspension with it.

PRODUCT BENEFITS

- Keeps solids from building up at bottom of the pit
- Dislodging of solid buildup at bottom of the pit
- Increase your agitation efficiency
- Increase uniformity and distribution of manure during pump-out
- Dislodging of >12" of solids annually at bottom of pit expected at high-end recommended rate

APPLICATION

Apply 50% of recommended rate when pit is 25-35% full, then apply 25% of recommended rate when pit is 50% full, and apply remaining 25% of recommended rate 30 days prior to pump-out. For maximum performance, distribute product equally through pit pump-outs.
