

Steric® Micro Copper 5%

F002331

GUARANTEED ANALYSIS

Sulfur (S)	1.00%
Copper (Cu)	5.00%

Derived from copper sulfate

ANGER

Causes skin irritation. Causes serious eye damage.

PRECAUTIONARY STATEMENTS

PREVENTION

Wash face, hands and any exposed skin thoroughly after handling. Wear protective gloves, eye protection and face protection.

RESPONSE

Specific treatment (see supplemental first aid instructions on this label).

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor.

IF ON SKIN: Wash with plenty of water and soap. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

May be harmful if swallowed. Very toxic to aquatic life with long lasting effects.

USE PRECAUTIONS - KEEP OUT OF REACH OF CHILDREN

As with all materials, user should exercise precaution to avoid potential phytotoxicity including foliar burning. Precaution is advised if applying this product in combination with other materials, a jar test for compatibility is recommended before tank mixing with other products. The pH of any final spray solution should be checked and an appropriate amount of the solution be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. User assumes full responsibility to ensure product, equipment and plant compatibilities. **PERSONAL PROTECTIVE EQUIPMENT RECOMMENDED. CONSULT SAFETY DATA SHEET FOR FURTHER INFORMATION.**

DO NOT APPLY NEAR WATER, STORM DRAINS, OR DRAINAGE DITCHES. DO NOT APPLY IF HEAVY RAIN IS EXPECTED. APPLY THIS PRODUCT ONLY TO YOUR LAWN/GARDEN, AND SWEEP ANY PRODUCT THAT LANDS ON THE DRIVEWAY, SIDEWALK, OR STREET, BACK ONTO YOUR LAWN/GARDEN.

GENERAL RECOMMENDATIONS

This product use is suggested as part of a valuable nutrition system program to enhance yields and quantity. Research has shown that foliar-applied nutrients are absorbed more efficiently by plants than are those supplied in the soil under adverse environmental conditions. This soil nutrient is uniquely formulated to supply nutrients in a readily available form for the plant to obtain a quick response to needed elements. A tissue testing program may be helpful to monitor and maintain optimum plant growth and quality. Nutrient translocation inside the plant is generally more rapid when applied foliarly.

Contact your Certified Crop Advisor for specific recommendations for your area.

DIRECTIONS FOR USE

Fill spray tank 1/2 to 1/3 with water. With agitator running, add product. Agitate while adding remaining water and any other fertilizer. Add pesticide last and continue to agitate. Agitate well prior to spraying if mix has been left standing for a short time. **WARNING:** Do not use this product with oil or within four weeks of an oil application.

IRRIGATION SYSTEM APPLICATION

Applications can be made through certain irrigation systems including, but not limited to, low volume systems and typical agricultural sprinkler systems. The specific injection equipment and irrigation system must conform to all federal, state and local regulations pertaining to the fertilization of plants through an irrigation system. Accurate and properly calibrated injection equipment and an irrigation system that is operated at maximum distribution uniformity will help avoid plant injury and/or product ineffectiveness. For best results, with the exception of center pivot and lateral systems, apply this product toward the end of the irrigation set. Allow sufficient time for the product to be flushed completely out of the entire irrigation system prior to turning off the irrigation water. Contact your Certified Crop Advisor for specific recommendations for your area.

APPLICATION RATES

Optimum rate of application will vary between fields, depending on soil pH and organic matter content. For best results, follow soil test or plant analysis recommendations.

Blueberries, Caneberries, Cranberries, and Strawberries: Apply 1-2 pints per acre prior to bloom. Do not apply after fruit set.

Field and Vegetable Crops: Apply 1-4 pints per acre at the appropriate stages of growth and development.

Forage Crops: Apply 1-2 pints per acre at the appropriate stages of growth and development.

Grass Seed & Turf: Apply 1-4 pints per acre in the normal spray program.

Small Grain Crops: Apply 1-2 pints per acre at the appropriate stages of growth and development, but before boot stage.

Tree and Vine Crops: Apply 1-2 pints per acre at the appropriate stage of growth and development, but before fruit set. Note: Before applying to pome or stone fruit, consult with a Certified Crop Advisor.

Foliar Applications (ground or air): Apply the recommended amount per acre application throughout the growing season as needed to maintain adequate levels of growth. Severe deficiencies may require more frequent applications. Use sufficient water to ensure good coverage. Do not exceed one quart per gallon of water. If applied too concentrated, slight burning of the foliage may occur.

Soil Applications: Use 2-4 quarts per acre as a preplant or side dress application. Dilute with water for more uniform application. May be applied in combination with fertilizers.

Irrigation System Applications (Soil, Drip, or Sprinkler): May be applied through irrigation systems at a rate of 1/2 to 1 1/2 gallons per acre.

STORAGE AND DISPOSAL

Store in a cool, dry place. Keep container tightly closed and out of direct sunlight during storage for extended amounts of time. Do not add water or other material to the container. Do not contaminate water, food, or feed by storage and disposal. Store above 32°F. In case of a spill, clean up promptly using trained personnel and pre-planned procedures. Dispose of content and/or container in accordance with local, regional, national and/or international regulations.

Lot No.: XXXXXX

Mfg Date: MM/DD/YYYY

Exp Date: MM/DD/YYYY

Net Contents: 2.65 gal (9.46 L)

Net Wt.: 24.07 lbs lbs. (10.93 kg)

Inv. ID: 1007852

Density: 9.63 lbs./gal (1.15 kg/L) at 68°F (20°C)

In case of emergency call INFOTRAC: 800-535-5053 or INTL INFOTRAC: 352-323-3500
